

## ADCCP Certified Data Center Cleaning Vendor

---

### ProSource is an ADCCP nationally certified data center cleaning provider

ProSource provides specialized cleaning services and related products to data center facilities to help prevent the high cost of equipment related business interruptions caused by contamination build-up inside data centers. The cost of downtime is significant and should be prevented. Our solution has a minimal investment with a high return of cost avoidance, and is an industry recommended best practice.

#### Association of Data Center Cleaning Professionals

The Association of Data Center Cleaning Professionals is a non-profit trade association composed of data center industry end-users, consultants, manufacturers, and vendors. ADCCP was formed in 2011 to help educate and protect data centers by develop industry standards for data center cleaning and to certify vendors that perform these services. Visit ADCCP's website at [www.adccp.org](http://www.adccp.org).

#### ADCCP's Mission

ADCCP's mission is to educate end-users on the need to clean their data center, and to connect data center operators with certified data center cleaning professionals. All of ADCCP's member companies must meet minimum data center cleaning industry standards to become an ADCCP certified data center cleaning professional.
