

## Insurance Requirements for Data Center Vendors

**ProSource provides insurance coverages that meet & exceed industry standards**

### Higher Insurance Liability Coverage

ProSource provides a high level of insurance coverage that meets and exceeds industry standards for work being performed in mission critical data centers. As part of our industry certification with the Association of Data Center Cleaning Professionals ([www.adccp.org](http://www.adccp.org)), you will receive the highest coverage's available for data center cleaning in the industry; General Liability Coverage of \$2M and Umbrella Liability Coverage of \$10M.

### ADCCP Certified Data Center Cleaning Vendor

ProSource is an ADCCP certified vendor that provides specialized cleaning services and related products to data center facilities to help prevent the high cost of equipment related business interruptions caused by contamination build-up inside data centers. The cost of downtime is significant and should be prevented. Our solution has a minimal investment with a high return of cost avoidance, and is an industry recommended best practice.

### ADCCP's Mission

ADCCP's mission is to educate end-users on the need to clean their data center, and to connect data center operators with certified data center cleaning professionals. All of ADCCP's member companies must meet minimum data center cleaning industry standards to become an ADCCP certified data center cleaning professional.
