Data Center Cleaning

Clean & optimize your data center's environment

Routine data center cleaning reduces contamination that flows into servers and accumulates over time. According to ASHRAE, cleaning prevents the risks of downtime and improves the efficiency of servers.

- **Reduces contamination** build-up in subfloor & servers

- **Improves server efficiency** by reducing dust build-up

- **Prevents downtime** Related to contamination build-up

- **Industry recommended** to optimize the data center

- **National coverage** with 20+ years of experience

Cleaning services for critical & non-critical areas

We offer a full suite of cleaning services to meet all your needs. We not only provide specialized cleaning for your critical areas, but we can also offer daily custodial and disinfection services for non-critical areas.

- Subfloor plenum cleaning

- Raised floor cleaning

- Equipment cleaning

- Overhead & ceiling plenum cleaning

- Containment structure cleaning

- Custodial services for non-critical areas

- COVID high-touch & electrostatic spray disinfecting
