

Data Center Containment Systems

Contain & improve your data center's cooling

We offer custom and prefabricated aisle containment systems for both new construction and retrofit projects. Data center containment helps eliminate bypass airflow and maximizes cooling efficiency.

- **Custom containment**
designed & installed to your specs
- **Prefabricated components**
include doors, roofs, & walls
- **Cabinet containment**
contains airflow inside cabinets
- **Structured ceilings**
designed for hanging heavy loads

Benefits of data center containment

- Eliminates wasted cooling & bypass airflow
- Improves efficiency of the existing cooling system
- Reduces utility & operating costs

Technical assistance, design & installation

We offer technical assistance to determine the right solution for your data center. Also, we provide custom design and installation services for small and large projects.

Industry-leading brands & solutions

We're a value-added reseller and distributor for leading containment manufacturers. We represent Tate, Polargy, Upsite, and other top brands.
