

# Data Center Maintenance Solutions

---

ProSource provides data center facility maintenance products and services. With 25+ years of experience, we are the right choice to improve and protect your data center. We offer competitive pricing and discounts for multi-site contracts.

## Airflow Management

Airflow management prevents cooling from bypassing servers. Managing airflow will maximize your existing cooling system's capacity and help avoid heat-related issues.

- floor grommets & blanking panels
- directional airflow panels & grates
- airflow dampers & controls

## Containment Systems

Containment provides the most efficient way to maximize your data center's cooling system by eliminating the mixing of supply and exhaust airflow.

- custom cold & hot aisle containment systems
- prefabricated containment doors, walls, & ceilings
- cabinet containment systems

## Cleaning & Disinfecting

Data center cleaning reduces contamination that flows into servers and accumulates over time. It helps improve server efficiency and avoid downtime.

- subfloor, raised floor, & equipment cleaning programs for critical areas
- covid-19 disinfecting & daily custodial available for non-critical areas
- post-construction & site preparation cleaning

## Power Whip Assemblies

Factory-built power whips save time and money vs. site-built whips. Manufactured to your exact specifications, our whips pass stringent testing and ship in 24-48 hours.

- manufactured to exact specifications
- matching circuit breakers
- quality assurance testing & UL Listed assemblies

## Raised Flooring Replacement

Refurbished raised floor panels are a cost-effective way to match and replace old floor tiles. Plus, we can provide installation and repair of your raised floor's substructure.

- refurbished matching raised floor panels
- installation & repairs of substructure
- disposal of old flooring panels
