

Data Center Facility Solutions

With 20+ years of experience, ProSource offers a wide variety of solutions to improve and protect your data center. We can also provide nationwide service for all your cleaning needs at all your data centers across the US.

Cleaning Solutions

We offer nationwide service for your entire facility including white spaces, gray spaces, and administrative areas with trained data center cleaning technicians.

- White spaces like subfloors, raised floors, cabinets, and ceilings
- Gray spaces like mechanical, electrical, generator, and battery rooms
- Administrative support areas like lobbies, offices, breakrooms, and restrooms

Cooling Solutions

We can help maximize your HVAC system's existing capacity and provide an optimal environment for servers by minimizing heat-related problems.

- Bypass airflow floor grommets and server cabinet blanking panels
- Directional airflow tiles and high capacity airflow grates
- Cold and hot aisles containment systems
- Thermal monitoring of server cabinets and cooling units

Power Solutions

We can help with branch circuit power needs to connect facility power to servers inside new cabinets as you build out your data center.

- UL-listed factory-built and tested power whips with 24-hour turnaround
- Matching name brand factory tested circuit breakers
- Custom-built rack PDUs with advanced functionality and reliability

Flooring Solutions

We are the source to help you locate and purchase refurbished raised floor panels and specialty airflow panels and grates.

- Refurbished floor panels with new laminate surfaces to match existing flooring
- Less expensive attic stock options with smaller minimum quantities for less
- Installation, repair, & maintenance of raised floor systems and epoxy coated floors
