

Installing new server cabinets?

Save time & money with our suite of products for new cabinet installs

Power Whips & Circuit Breakers

Our factory-built power whips save you time and money vs. site-built whips, and they are factory-built to your exact specifications with UL Listed components.

Key Benefits

- Save up to 40% vs. site-built whips
- Reduce installation time by 50%
- Made with UL listed components
- Factory testing ensures reliability
- Orders ship in 1-2 days

Rack Power Distribution Units

Our next-generation PDUs are made with automated machine soldering that makes them 270% less likely to fail than brands with mechanical terminations.

Key Benefits

- Next-day shipping for 30+ models
- 8,000+ customizable configurations
- Slim design and angled whip input
- Takes up less space in server racks
- Manufactured in the USA

Floor Grommets & Blanking Panels

Data centers can lose up to 50% of conditioned air before reaching servers due to unsealed floor openings and holes in cabinets.

Key Benefits

- Seals unnecessary openings
- Increases existing cooling capacity
- Increases subfloor static pressure
- Captures stranded cooling capacity
- Reduces supply/exhaust air mixing
