

Cooling management

High-quality products for your data center.

Proven products from manufacturers you can trust.

COOLING MANAGEMENT

Maximize cooling capacity and reduce heat-related issues.

Although most data centers provide more than enough cooling, it often bypasses servers. Managing airflow maximizes existing cooling capacity and avoids heat-related issues.

Key Benefits

- Reduces wasted cooling
- Reduces heat-related issues
- Maximizes existing cooling

Products

- Floor grommets
- Server blanking panels
- Directional & high-capacity grates
- Cold & hot aisle containment
