

A photograph of a data center aisle showing several white server racks with glass doors. The racks are filled with server units, and their internal components are visible, glowing with blue and yellow lights. The perspective is looking down the length of the aisle. A large, semi-transparent blue rectangular box is overlaid on the middle section of the image, containing the text "DATA CENTER CLEANING" in white, bold, sans-serif capital letters.

DATA CENTER CLEANING

Certified nationwide service

DATA CENTER CLEANING

Comprehensive data center cleaning services for your entire facility with nationwide coverage for all your locations from a certified vendor.

One vendor for all your data center cleaning

With over 25 years of experience, and industry certified, we have the expertise to clean your data center safely.

Whether you need data center cleaning for computer rooms, support areas, or office, we can help.

We've developed a proven service model for data centers that effectively cleans and removes contamination.

Why you should consider ProSource:

- Industry certified
- 25+ years of experience
- Direct service across the U.S.
- Affordable pricing & volume discounts
- Flexible scheduling 7/24/365
- Screened & trained employees

Certified to clean your data center.

We are extremely proud to have achieved the **Cleaning Industry Management Standard (CIMS) certification** from ISSA – the worldwide cleaning industry association.

This significant milestone is a testament to our dedication to cleaning your data center facility according to the cleaning and facility solutions industry standards and best practices, while also ensuring you receive top quality service.

Our commitment to cleanliness & customers

- Trustworthy and professional team members
- Accredited management systems and processes
- Effective cleaning protocols and practices
- A sustainable business model
- Reduced costs with improved efficiency and services

Remove dust and contamination.

Critical cleaning focuses on removing contamination in your data processing areas to prevent accumulation in servers.

Specially trained crews use the best-in-class equipment to safely and effectively remove dust and other contaminants.

Our team will work to schedule cleaning when it's convenient with your maintenance windows, 7/24/365.

Critical cleaning services include:

- Subfloor plenum cleaning
- Raised floor cleaning
- Non-raised floor cleaning
- Equipment surface cleaning
- Interior cabinet cleaning
- Overhead cable tray cleaning
- Ceiling plenum cleaning

Clean customer and employee areas.

Maintain customer and employee areas with routine services that make your data center facility shine.

Our trained personnel understand the sensitive nature of your data center and keep it looking its best.

Areas include lobbies, break rooms, conference rooms, offices, cubicles, restrooms, elevators, and more.

Custodial cleaning services include:

- Contract cleaning services
- Hard floor strip and waxing
- Carpet and upholstery care
- High-touch disinfecting
- Window cleaning
- Power washing

Prevent the spread of infection.

Disinfect every area of your data center to protect customers and employees and prevent the spread of infection.

We provide daily disinfection, high-touch disinfecting, and electrostatic disinfection spraying for large areas.

Surfaces include door handles, light switches, workstations, keyboards, phones, water fountains, restrooms, & elevators.

Disinfection cleaning services include:

- Daily disinfection
- High-touch disinfection
- Electrostatic disinfection spraying
- Specialized disinfection programs
- Approved disinfectants

Get started with a clean slate.

If you've recently updated, added on, installed new equipment, or built a new data center, we can help.

Project cleaning is important because it removes harmful dust and contamination that can become airborne during changes.

Servers ingest conditioned air so ensure your data center is cleaned professionally before you power up your servers.

Post construction cleaning services include:

- Post-construction cleaning
- Post-installation cleaning
- Preventive maintenance cleaning
- Move-out turnover cleaning

DATA CENTER PRODUCTS

Improve and protect your data center with innovative products that increase efficiency and save you money.

Manage your cooling, power, and flooring.

Cooling Management
