# DATA CENTER CLEANING

**Ensuring Data Centers Stay Clean and Compliant**

# DATA CENTER CLEANING

Since 1994, we've focused on helping data centers keep critical areas clean and free of harmful contamination.

## Proven experience you can trust.

ProSource specializes in data center cleaning and air quality monitoring for hyperscale, colocation, HPC/AI, and enterprise mission critical facilities.

Our critical cleaning services include post construction, post installation, preventive maintenance, and move out turnovers.

In addition, we offer advanced air monitoring and purification solutions designed to protect high-density computing environments from undetected contamination.

### Why you should consider us

- CIMS certified with proven experience
- Local service with nationwide coverage
- Competitive pricing with quality guarantee
- Flexible scheduling 7/24/365
- Trained & uniformed company employees
- Integrated air quality monitoring and purification

# Certified to clean your data center.

We are extremely proud to have achieved the **Cleaning Industry Management Standard (CIMS) certification** from ISSA - the worldwide cleaning industry association.

This significant milestone is a testament to our dedication to cleaning your data center facility according to the cleaning and facility solutions industry standards and best practices, while also ensuring you receive top quality service.

## Our commitment to cleanliness & customers

- Trustworthy and professional team members
- Accredited management systems and processes
- Effective cleaning protocols and practices
- A sustainable business model
- Reduced costs with improved efficiency and services

# Remove dust and contamination.

Critical cleaning focuses on removing contamination in your data processing areas to prevent accumulation in servers.

Specially trained crews use the best-in-class equipment to safely and effectively remove dust and other contaminants.

Our team will work to schedule cleaning when it's convenient with your maintenance windows, 7/24/365.

## Critical cleaning services include

- Subfloor plenum cleaning
- Raised floor cleaning
- Non-raised floor cleaning
- Equipment surface cleaning
- Interior cabinet cleaning
- Overhead cable tray cleaning
- Ceiling plenum cleaning

# Get started with a clean slate.

If you've recently updated, added on, installed new equipment, or built a new data center, we can help.

Project cleaning is important because it removes harmful dust and contamination that can become airborne during changes.

Servers ingest conditioned air so ensure your data center is cleaned professionally before you power up your servers.

## Project cleaning services include

- Post-construction cleaning
- Post-installation cleaning
- Preventive maintenance cleaning
- Move-out turnover cleaning
- Ongoing preventive maintenance cleaning

# Protect data center equipment.

Protect your data center equipment with continuous air quality monitoring and advanced air purification solutions.

Uptime and equipment reliability are critical for data centers. However, many overlook a significant threat: indoor air quality.

Concentrations of tiny particulate matter can lead to hardware failures, reducing the lifespan of critical infrastructure and disrupting operations.

## **Air quality monitoring and purification include**

- Continuous indoor air quality monitoring
- Realtime data analytics and reporting
- Air purification treatments
- Customized alerts and notifications
- Monthly service plans

# Clean customer and employee areas.

Maintain customer and employee areas with routine services that make your data center facility shine.

Our trained personnel understand the sensitive nature of your data center and keep it looking its best.

Areas include lobbies, break rooms, conference rooms, offices, cubicles, restrooms, elevators, and more.

## Custodial cleaning services include

- Contract cleaning services
- Hard floor care
- Carpet and upholstery care
- Disinfection services
- Window cleaning
- Power washing services

# DATA CENTER PRODUCTS

Improve and protect your data center with innovative products that increase efficiency and save you money.

## Value added products for your data center.

### Cooling Management

Containment walls, doors, ceilings, and bypass airflow products

### Power Distribution

UL listed and tested factory-built power cables and circuit breakers

### Raised Flooring

Refurbished floor panels, directional airflow panels, and grates

### Facility Supplies

Consumable restroom supplies, entrance and sticky matting, and more
