

Ensuring Data Centers Stay Clean and Compliant

Executive Summary

ProSource specializes in data center cleaning and air quality monitoring for hyperscale, colocation, HPC/AI, and enterprise critical facilities. Our critical cleaning services include post construction, post installation, preventive maintenance, and move out turnovers. In addition, we offer advanced air monitoring and purification solutions designed to protect high-density computing environments.

Data center services

- Subfloor & ceiling plenum cleaning
- Raised & non-raised floor cleaning
- Exterior & interior equipment cleaning
- Overhead raceway cleaning
- Continuous air quality monitoring & advanced air purification

Data center products

- Factory-built power whips and cables
- Containment walls, doors, and ceilings
- Bypass airflow grommets and panels
- Directional and high capacity airflow panels
- Refurbished raised floor panels
